

# The completion of EndorAB\_DC2

## 18/11/2016

I manage to complete the last part of my assignment for the endorAB\_DC2 DM.  
According to assignment i had to:

- create 1 new domain controller (EndorAB\_DC2).
- Add new users and groups according to the instructions.
- To create a loggonscript on a shared folder.
- To add a .bat script statement that assigns automatically the user folder to the respective folder in the homefolders assigned with the partition letter H:

The action to create the new domain controller and to add the extra users and groups , (plus the correspondand privileges), was straight forward and i do not need to explain forward, only to add that i made those changes according to the instructions.

The issue with the script was something that took me bit more time and efford i solved the needs of the instructions by writting two statements to the **loggonscript.bat** on the EndorAB\_DC2 after the C folder:

**net use h: \endorAB\_dc1\homefolders\%UserName%**

**Echo welcome %UserName%**

**Pause**

## the installation of the workstation WS8

---

I installed the WS8 as virtual machine on my HyperV and I configured its ipv4 to the following adresses: - ip 10.20.0.160 - subnet mask 255.255.255.0 - standard gateway 10.20.0.1 - DNS 10.20.0.159

I had to install again the WS8(B) again, because I deleted the previous Working station (WS8A).

The installation the login, and the check of the functionality of the EndorAB\_DC1 was without any problem. The mission was accomplished and the WS8 was uninstalled.

# What i added to the active driectory

## Endor.local

---

- Users

- Percy Nilegård
- Elisa Andersson
- Kurt Nilsson
- Adam Svensson
- Lotta Luvine
- Kalle Osborne
- Ada Adair
- Erik Lallerstedt

- Halvar Helland
- and 3 template accounts.

- Groups

- Global
  - VD
  - LedningsGruppen
  - Data Admin
  - Ekonomi
  - Sälj Malmö
  - Sälj Göteborg

- Lager
- Verkstad
- Promotion
- Finland
- Local
  - Ledning
  - Ekonomi Malmö
  - Sälj
  - Malmö Lager
  - Malmö Verkstad
  - Malmö
  - Göteborg
  - Data
  - Reklam

On the partition C of the VM, (EndorAB\_WS2012R2\_DC1) i added the following folders:

- Ledning
- Ekonomi
- Sälj
- Lager
- Verkstad
- Malmö
- Göteborg
- Data

The members and the privileges were graded properly according to the assignment, but i am not able to document them because of their complexity.
